

Task 1

For executing Task 1, open the Task 1 folder and follow either of:

1. Run <python "Task 1 - File Processing.py"> in Terminal/CMD.
2. Open "Task 1 - File Processing.ipynb" in Jupyter Notebook, and Run all cells.

Note:-

- a. "Input_Data" folder contains the input data (to be processed), i.e., the folder "FS_L".
- b. "Processed_Data (Output Folder)" folder contains the output (processed) data, i.e., the folder "FS_L".

Task 2

For executing Task 2, open the Task 2 folder and do as follows:

For Linux and Mac – Run the following commands in sequence in Terminal

1. export FLASK_APP=flaskr
2. export FLASK_ENV=development
3. flask run

For Windows CMD – Run the following commands in sequence in CMD

1. set FLASK_APP=flaskr
2. set FLASK_ENV=development
3. flask run
